The Glee Club's Dance.

Glee Club members did themselves proud on the occasion of their popular dance Friday evening last, which proved to be the event of the season. The best people of the town and district were present, and visitors were there from Leduc to Evansburg. From the latter place the big bus made a special trip here with a load. The hall's record crowd was present, and danced to Martin's music. Inquiries are already being made as to the date of another of these popular events.

Death of Louisa Miller.

On Saturday morni. g. Oct. 11th, Louisa, the 11 years-old daughter of Mr and Mrs John B. Miller, passed away, at her parents' residence, Third street east. The young girl had taken sick several weeks ago in Vancouver, where she was at that time, with her father.

The funeral took place on Monday afternoon; a service being held in St Matthew's church (Missionary Synod) by the pastor, Rev E. Eberhardt. Interment took place in St Matthew churchyard.

Skilful Equines.

While Mr Karl Grosskopf was driving across town last Friday evening his two pet ponies Dunder and Blitzen took fright at the noise made by the aeroplane which was delivering mail at the local postoffice. Starting east, the team made the first block in good time; but on getting to the hill at the blacksmith's D. & B. and the democrat were hitting it up at about 30 m.p.h. They made the circuit of the town, and on coming back to where they started, deposited part of the democrat on the roadster being brought to a local mechanician; damage to roadster \$5.

Saturday's daily runaway occurred about 5:30 p.m. when a team belonging to a prominent local farmer which had been left standing on Main street north became frightened at the barking of a little brown dog. The team bolted south on Main street, occasioning quite a scurrying of pedestrians for shelter. At Wudel's corner the team turned east, running out to Meridian road, and thence south. A town man jumped in his car, motored after them, and captured the runaways about a mile south.

While motorists have numerous regulations to comply with, regarding speed of their car; every day seems to be the open season for runaway teams in Stony.

Attitudes Of Mind

It is reported in a daily newspaper that some doubt existing as to which side of the international boundary line between Canada and Maine a certain old lady's farm was located, surveyors were employed and the decision finally reached that it was on the United States side. "I'm so glad!" exclaimed the old lady. "Canadian winters are so severe."

Travelling from the United States to Canada on one occasion, the writer overheard a passenger remark just after the train had entered Canada: "The air is so much sweeter and purer now that we are back in Canada."

Climate, however, is not an attitude of mind, but, nevertheless, very real. It leads one, however, to wonder whether many people do not approach many of their daily activities, not on a basis of actualities, but from some purely mental reaction.

On the day following the general election of July 28 last, a merchant in one of our Saskatchewan cities, a strong Conservative by the way, declared that his business had already greatly improved. He overlooked the fact that two fairly large conventions then in session in the city might have added somewhat to his day's sales. No, it was an attitude of mind with him, — business had improved over night because the Conservatives had won the election.

It is the same with many in respect to hard times. Some people whose salaries, or wages, or other sources of income, are the same now as they were in the boom days, or even greater, but whose cost of living is much less, due to lower commodity prices, "feel" harder up than many who actually suffer, they become terribly pessimistic and continually harp on the blue ruin aspect of things, and how difficult they are finding it to make ends meet.

Without in the least discounting actual conditions, it is safe to say that with many people hard times is an attitude of mind, superinduced, maybe, by fear of the real thing, rather than the thing itself. Unfortunately there are many who are faced with truly hard times and have concrete problems to solve and difficulties to overcome, but there is a multitude of others who are no worse off today than they ever were but who "think" they are. They are largely responsible for cultivating and disseminating ideas that conditions are much worse than is actually the case.

The influence of mind over matter is a well authenticated and recognized fact. Records in doctors' offices contain scores and hundreds of cases of people who, having nothing the matter with them, imagined there was something wrong by and constantly and morbidly dwelling on their imagined ills until all did become chronic invalids.

There is, too, that state of mind wherein people develop suspicions of others without any cause or evidence to support such suspicions, but having become suspicious of another, every word and act of such persons, however sincere and innocent, only serves to confirm and intensify the suspicions of the former.

Such attitudes of mind are to be deplored, and their cultivation to be guarded against by every individual. The harm done through constant thinking of unpleasant and evil things, and the harboring of thoughts of suspicion of others, or even of weaknesses in one's self, is almost incalculable. It spreads like a malady through society polluting the life of whole communities.

Fortunately, the reverse of this is also true. The cultivation of clean, kindly and noble thoughts, the development of feelings of confidence in and goodwill towards one's neighbors, creation of the habit of looking at the bright rather than the dark side of things, also spreads through society and uplifts and brightens the lives of all persons with whom such a sane and happy individual comes in contact.

Jamaica Buys From Canada

Is Grateful For Tariff Preference On Fruits and Vegetables

Canada is getting all kinds of business that formerly went to the United States because of Jamaica's gratitude to Canada for recent tariff preferences, according to L. T. Kennedy, prominent business man of Kingston, Jamaica, who was a recent visitor in Montreal.

"We in Jamaica are very grateful to Canada for her preference in fruit and vegetables. In a recent half million dollars worth of business which formerly went to the United States is now being diverted to Canada. We buy a great deal of flour from you, among other things," he said.

A woman may be clever enough to do any work a man can do but the cleverest gets some man to do it for her."

Wealthy For a Day

Girl Student From Copenhagen Enjoyed Herself In Berlin

Miss Maiken Boring, a student of medicina from Copenhagen, Denmark, experienced being a millionaire for a day in Berlin. She had won first prize in a contest sponsored by the Danish daily, "Politiken," which meant that she was permitted to spend one day in Berlin with all bills, no matter how high, paid by the paper.

There was one condition, however. Miss Boring was not allowed to acquire anything which might be of value to her after her role of millionaireness expired.

She therefore found the task of spending money somewhat difficult. A visit to Prof. Albert Einstein, an airplane spin, a tour about town in a costly limousine, sumptuous meals at the most expensive Berlin restaurants and attendance at a theatre comprised her day's "extravagances."

Pale People Are In Peril

Some Form Of Nervous Breakdown Always Threatens

Pale people are almost always nervous. Paleness denotes lack of blood in the body, blood usually remains in blood vessels, sleeplessness, headaches or neuralgia.

Dr. Williams' "Pink Pills" are different from most other medicines in that they are impossible to take in and not feel better. Their whole mission is to make rich, red blood. This new blood strengthens the body and gives vitality to the whole body. Concerning them Mrs. G. Cook, Bloor Street, Toronto, says: "Twice a day I used Dr. Williams' Pink Pills for a nervous condition and with the result that I have been well and strong ever since."

You can get these pills or any of 500 different medicines or by mail or by sending a box from the Dr. Williams Medicine Co., Brockville, Ont.

Canada Playing Valuable Part

Vancouver Expert Will Lay Rails For Bermuda's First Railway

Canada will play a valuable part in the construction of Bermuda's first railway, which is hoped will be completed within a year or so. Louis McDonald, of Vancouver, expert in road beds and track laying, has gone to Bermuda to lay the C.N. steamer "Duke of York" after a ten month's absence. He will bring his men to Montreal to lay the line later to Bermuda. The Vancouver expert has been 35 years in the business of rail laying. He served under General J. W. Stewart in the 12th Railways during the world war and is now working with Belfour, Beatty and Co., London, England, builders of the new railroad.

Women and Asthma. Women are numbered among the sufferers from asthma, the most common complaint. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the services of Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely gratis, will be sent to any woman who may benefit by it. The remedy is the same as that which it has wrought among women everywhere.

His Nightly Message

This often repeated nightly message which his chauffeur delivered to Sir J. Bickerstaffe was on the latter's funeral wreath: "The fire's dying out; the water is nice and hot; the windows and doors are bolted; the mouse traps are set and there are no mice. Good-night, Sir John."

If Miller's Worm Powders needed the support of testimonials they could be got from mothers who know the great value of this excellent medicine. But the parents will speak for themselves and in such a way that there can be no question of their words. They act speedily and thoroughly. The time to which they are administered will show improvement from the first dose.

Parachute For "Plane

A parachute for an aeroplane, designed by Dr. J. T. Parker, a dentist of Cleveland, Ohio, is intended by pressing a control lever. This opens a trap-door in the upper wing and the parachute is shot out. The "chute swings the "plane and pilot slowly to earth, and has a landing speed of about 15 miles an hour.

Minard's Liniment has a hundred uses.

Canadian Aviation History Is Made When Bird Men Travel 20,000 Miles Over Arctic Area

When two seaplanes soared down to a safe landing on the Ottawa River recently, it marked the end of possibly the most outstanding flight in Canadian aviation history. For the past two months the planes had traversed the frozen wastes of the far north. In that time, they travelled 20,000 miles, mapped a small empire of virgin territory and made mineralogical and topographical surveys of many parts of Canada's hinterland.

Yet it was all in the day's work for the men who made the trip. When the men shrug of the difficulties and the terms come, "Why, it was nothing!" they whh had written such an important chapter in Canadian exploration and aviation history, dismissed the whole matter. Flight-Lieut. F. J. Mawdesley was in charge of the detachment and piloted one of the machines. Flight-Sergt. H. J. Winny helped the other plane, while the survey and photographic work was in charge of C. S. Macdonald, of the Department of the Interior, an experienced Arctic traveller. Sergt. S. C. Dearman, the mechanic and camera operator.

The trip took the two planes as far west as the Arctic. The Maidenland and as far east as Rupert Bay, an inlet on the extreme north-east portion of Hudson Bay. Chesterfield Inlet and Churchill were two of the intermediate points touched which are familiar. A total of 2,800 photographs were taken, representing thousands of square miles of territory never before mapped or surveyed. In addition to this work, the caches of gasoline and oil, maintained in this mechanized age for exploration work in the north, were inspected. Suitable air routes were mapped and the river bottoms charted. This latter work was undertaken to determine if possible, the economic possibilities of the north.

The party made numerous tests of aeronautical equipment and, among other things, discovered a device for countering the effects of the magnetic pole. Previously it had been reported that the proximity of the magnetic pole influenced the compass needle, making it sluggish and, in some instances, utterly destroying its usefulness. Equipped with a British periodic compass, neither plane experienced any difficulty in navigating within the pole region.

Mink Shipped From Yukon

Five Hundred Sent To Sweden and United States Points

Five hundred dark, damp, little noses pressed against strong wire bars, and five hundred little mouths screechingly crying disgust at being caged, signified the arrival at Vancouver of the steamship "Princess Louise" from Alaska, with the largest shipment of mink to ever pass through British Columbia. Raised in captivity by George Simons of Carcross, Yukon Territory, the furbearers were sent on to Gothenburg, Sweden, where a few for United States points, where they will either serve milady's wardrobe or be distributed for the nucleus of mink farms in and around those territories.

Wheat Situation Sound

Canada's wheat situation, both as to marketing and prospective price, and also as to the wheat-growing future, fundamentally is such as to discourage pessimism. That is the verdict of B. P. Alley, assistant-general manager of the Canadian Bank of Commerce, in charge of the bank's business in Western Canada.

"Have you serious intentions that girl you are always with?"
"Yes, to get rid of her as soon as possible."—All for Alia, Stockholm.

W. N. U. 1859

Dairy Cattle Capture Prize

Eighteen Head From C.P.R. Strathmore Farms Win Awards At Spokane

Eighteen head of dairy cattle from the Canadian Pacific Supply Farm at Strathmore, carried off sixteen firsts and ten second prizes as well as all the championship ribbons at the Washington Inter-State Livestock Exhibition at Spokane recently, according to E. Ward Jones, superintendent of the railway's department of agriculture and animal industry. Included in the awards won by the Strathmore herd were the male and female grand championships, senior and junior female championships and the junior male championship.

(By Eva A. Tingey.)

SCHOOL-CHIC

All Tingey models are created and sketched in Paris and the patterns are made in New York.

For wear in school here is a chintz-style dress, however, it is not school wear. The white is required other materials will render the model suitable for various occasions.

For afternoons, velveteen would be a more attractive material with white or some other contrast against the frock for collar and cuffs. For very smart wear a pattern of dots and cuffs of metal tissue can be worn.

With woolens and washing materials like chintz or gingham, collars and cuffs can be made of the same or washing silk according to the type of the frock. If the dress is developed in criss-cross and cuffs or taffeta, for the collar and cuffs, make a stand and a rather wider, self sach instead of the belt to knot at the back.

The pattern may be obtained in size 8 to 12. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamp or coin) to Farnham Building. Write plainly and number the name and full address, the number of the pattern and the size you want.

Although the water in the Arctic and Antarctic oceans is salty, the ice that forms is free from salinity.

Shipment Under Empire Marketing Board Scheme

British Columbia Receives Consignment Of Pure Bred Livestock

The B.C. Provincial Department of Agriculture received word recently from Agent-General F. A. Paulins in London, England, that the first shipment of pure bred live stock to be shipped to British Columbia under the Empire Marketing Board scheme via the Panama Canal had left the Old Country for Vancouver. The shipment consisted of 38 rams and ewes for breeders on Vancouver Island and the lower mainland, and a Red Poll Bull by H. E. Waby, of Enderby, president of the Canadian Red Poll Breeders' Association. The Dominion Government has established a quarantine station for live stock at Vancouver, which was ready when the shipment arrived at the end of September.

Special interest attaches to a part of this shipment of sheep as it comprises the first group of Kerry Hill sheep ever to come to Canada. These animals have been brought out as an experiment by Chas. Ecclestone, Victoria, and come from the flocks on Lord Earle's Broughton estate at Oswestry, Shropshire, England. His brother, Bert Ecclestone, is shepherd there, but formerly resided in B.C. and believes that these sheep will stand the Canadian climate well.

Extraction May Be Costly

German Find Extracting Beryllium From Beryl Hardly Pays

Canadian technical experts professed their inability to find any special report for the Imperial conference on the beryl deposits near Winnipeg in Manitoba. On behalf of the mines branch of the Canadian government there had been inquiries into the possibilities of extraction of beryllium—which is used in light metal alloys—from the Manitoba beryl, it was stated.

Experiments by a German concern, however, had tended to show the cost of extraction of beryllium from beryl was very high in comparison with the result obtained, and the Germans were now turning to lithium for light alloy, it was pointed out. The Canadian official was watching the German experiments closely, for lithium occurs in greater frequency in Manitoba than does beryl.

Real Drive Against Weeds

The sow thistle, twitch and other troublesome weeds, the roots of which have been turned to the full strength of the sun, will have no vitality left to reestablish them another year. More early ploughing of soil and after harvest cultivation than usual have been accomplished this year. Even without a word from the weed inspector, farmers are making a real drive against weeds—Farmers' Advocate.

Although tea was grown in China as early as the sixth century, it was not heard of in Europe for another thousand years.

"Influence, my boy, is what you think you have till you try to use it."

THREE RECORD BREAKERS

Three heifers that have made dairy history in Alberta are shown above. They are all three to four years old. From left to right are Farnie Wallie, from Redwood Warwick and Laura Fremosa, and between them they produced 77,460 pounds of milk in the year, respectively, to last June, last May and last April. This averages out to 25,830 pounds of milk which beats the highest record made by a four-year-old in Canada in 1926 by 2,000 pounds, while the average dairy cow in Alberta produces less than 4,000 pounds. They are the property of the Canadian Pacific Railway at the company's experimental farm at Strathmore. The first two are four-year-olds, and the last is a

three-year-old. They were bred on an average Ontario farm, all sired by "top" bulls and much purchased by the Canadian Pacific when under eighteen months of age.

Production, according to E. W. Jones, superintendent of Agriculture and Animal Industry for the railway, is very largely a question of proper development of "milk handling. These three cows produced in one year more than nineteen average Alberta dairy cows. To do it, they were well fed and given good care during the lactation period, but up until freshening were "developed outside where in winter months they were given good roughage but very little grain.

Wide Discrepancy Exists In Estimates of Amount of Russian Wheat Exported To Britain

Entire Supply Is Given Them At One Time

One of the strangest things to the ordinary individual is that the figure of the entire supply differs from that of other live stock in that the bees are given their whole winter supply of food at one time, while other stock receive their rations day by day. Toward the end of September, the bees should receive sufficient food to tide them over the fall, the winter and the spring until the warm days come and they can gather nectar.

Some beekeepers feed their bees sugar syrup; others give them natural stores—honey. When natural stores are given the food chamber method is usually employed. To get an idea of what the food chamber is, let us look at a bee and we will see that it is built up like a large, bulbous, storey by storey. The lower or ground storey is called the brood chamber and it is here that the queen reigns. The storeys above this are the ones in which the honey is placed by the bees.

As the first honey brought in at the beginning of the main flow is considered the best, and the bees, which are sometimes confined to the hive without the chance of a cleansing flight for close on 22 weeks, must have the best, this honey is set aside for them. This storey or box full of honey is called the food chamber. —Excerptural Farms Note.

Skim Milk For Hens

Tests Show It Gives Better Results Than Beef Scraps

In tests carried out for five winter months, November to February inclusive, at the University of Manitoba, receiving skinned milk laid more eggs and gained more weight than the ones given boiled water.

Skinned milk, says G. A. Langeller, of Cap Rouge Experimental Station. On the basis of the experiment, beef scrap is worth nine times as much as skim-milk, weight for weight, so that at the usual valuation of skim-milk at 20 cents per 100 pounds, beef scrap would only be worth \$36 per ton.

"That skim-milk may furnish all the protein required, 100 layers should get from 12 to 14 quarts per day," Mr. Langeller estimates. "If this can be spared for the poultry, care should be taken that it be given always sweet or always sour, to prevent digestive troubles, and that it does not freeze."

Soviet Russia is purchasing 100,000 quarts of skim-milk from Canada for combination harvester.

Production of window glass has just been introduced into Mexico.

Suburban theatres in Australia are installing talking equipment.

A wide discrepancy exists to estimate available in London, England, of wheat exported to Great Britain this season.

In Liverpool, centre of the grain trade, it was stated that only 620,000 quarters or about 150,000 tons, all of fairly good quality, have been received at ports of the United Kingdom from Russia between Jan. 1 and Sept. 27.

Estimates of British traders and official observers in London fixed the figure roughly at 450,000 tons for United Kingdom ports in July, August and September.

The difficulty of fixing figures of Russia's export wheat trade and of her exportable surplus is admitted by the Soviet government trading agencies are dealing independently with various grain concerns and there is no central place to obtain actual totals.

Russian officials here have no authority to disclose grain shipment figures, even if they were available. The problem of checking wheat exports is likely to be solved soon. Arrangements are being made to keep a tally at Istanbul of all Russian grain shipments from the Black Sea, whence all substantial cargoes pass.

According to figures available in London, recent wheat shipments from Russia began in July. During that month 26,000 tons were estimated to have arrived in British ports. Heavy consignments began to arrive early in August, and during August and the first half of September amounted to 400,000 tons.

It is estimated that about 15,000 tons are on the way to United Kingdom ports and an additional 26,000 tons en route to continental Europe. Besides these amounts it is believed in grain circles that nearly 100,000 tons, which already have been sold, now await shipment from Russia.

It is pointed out that Russia bought \$100,000,000 worth of goods from the United States and Canada and \$20,000,000 worth from Great Britain. These bills are falling due and must be met and the great stores on the shores of the Black Sea constitute the Soviet's most easily convertible asset. This despite the fact that Russia's domestic demands for wheat may not justify selling abroad.

There is an idea in some quarters that decreases in other Russian exports, such as timber, may be forcing the Soviet Government to take a chance of selling foodstuffs which may be needed later. For example, as a part of the five-year programme of development, Russia originally planned to send 75,000 tons of timber to the British market. This figure is not actually expected to pass the 600,000 mark and the Soviet planners face this deficiency in some other exportable product.

Trade officials in London are watching the wheat situation closely. One opinion expressed was that a great deal of forcing down of prices and propaganda to force prices down has been done by traders and others who are opposed to the operation of the Canadian wheat pool, the United States farm board and the proposed Argentine wheat pool.

An idea of the amount of Russian wheat shipped during previous years can be had from the fact that between 1909 and 1913 some world wheat shipments were: Russia, 4,750,000 tons annually; the United States, 3,250,000, and Canada, 3,000,000 tons.

Appendicitis caused more than 18,000 deaths in the United States in 1928.

The agent who tries to beat the "Limited" to the crossing is the one who puts the auto into autopsy.

"Suppose we fell in the water now?"

WHY FAT MEN STAY FAT

"The trouble with me, and I guess this applies to 99 out of every 100 men who are putting on weight, I didn't have the energy or 'spit' to keep it off. I had an active, healthy, athletic body and just lazed around accumulating the old pounds, until I got that Kruschen fever."

He takes Kruschen Salts—that's the common-sense way to reduce—but don't take them with the idea that they possess reducing qualities in themselves.

This is what they do—they clean out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape, and fill you with vigor and tireless energy.

As a result, instead of a pouting you're in an easy, trim, trim, trim moment and your fatigued fat accumulate, you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and needed to do to keep you in good condition.

Kruschen Salts are the up-to-date fountain of youth. Take a Kruschen tablet in a glass of hot water to-morrow morning and every morning—be careful of the foods you eat—take regular moderate exercise—then watch the pounds slide off.

WORLD HAPPENINGS BRIEFLY TOLD

Alex. Chisholm, prospector and veteran of the "trial of '98" is dead at Smithers, B.C., at the age of 70.

Wireless telegraph service has been established between Buenos Aires and Chilean cities and with Spain.

The \$100,000,000 Canadian government bond issue floated in the New York market October 7, was handsomely over-subscribed.

Assembly of the League of Nations stood in silence several moments on the occasion of the first anniversary of the death of Gustav Stresemann, German post-war foreign minister.

The eleventh assembly of the League of Nations adjourned Oct. 4 after wrestling earnestly for three and a half weeks with pressing world problems.

Reports published abroad that trouble had arisen aboard the British battle cruiser "Revenge," anchored in Gouf Juan harbor, Nice, France were denied by authoritative sources.

A number of delegates attending the Canadian Automobile Association convention at Vancouver endorsed the proposed highway through British Columbia to Alaska, in addresses made at the annual banquet.

The London Times editorially said that Russian dumping of grain on European markets was "clearly due first and foremost to desperate need of the Soviet Government for credits to finance their five-year industrialization plan."

The Department of National Defense announces that Major D. B. Sargent has been promoted to the rank of Lieutenant-colonel and to command the 2nd Battalion, the regimental headquarters are at Nanaimo, B.C.

The Oil Of Power. — It is not claimed for Dr. Thomas' Electric Oil that it is a panacea, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

Daily Air Service. — A daily air service between Lethbridge, Calgary and Edmonton, Alberta, a distance of 320 miles, has recently been inaugurated. This new service connects with the air mail service from Calgary to Winnipeg.

Against Grippe

Having a bottle of Minard's Liniment will at right times give often save a doctor's fee. For colds, sore throat, bronchitis.

IS ELECTED PRESIDENT

Walter Ashfield, Editor of The Grenfell Sun

Weekly Newspaper Publishers Meet

Fourteenth Annual Convention Of Canadian Weekly Newspaper Association, Saskatchewan Division

At their fourteenth annual convention held at the Saskatchewan Hotel, Regina, the Canadian Weekly Newspaper Association (Sask. Division), elected Walter Ashfield, Editor of the *Grenfell Sun*, as president for the ensuing year.

H. G. Sheldrake of North Battleford, the retiring president, was chosen as honorary president; A. King, Rouleau, vice-president; S. J. Dornan, Alameda, secretary-treasurer; while the following were elected to the executive: S. N. Wynn, Yorkton; E. P. Hodings, Vanguard; J. Z. Jubb, Kerrobert; J. Scott, Whitewood; H. Berryman, Blaine Lake.

Several instructive addresses were given during the sessions. Mr. T. A. McInnis, of the Bureau of Publications, gave an interesting talk, and Hon. J. F. Bryant spoke on the subject of Saskatchewan's Resources.

The members of the association were guests of the Saskatchewan Government at a banquet on Thursday evening, Oct. 2. Following the banquet an informal dance, sponsored by the Toronto Type Foundry Co., was greatly enjoyed. At noon on Friday, Oct. 3, the members were tendered a luncheon by the Saskatchewan Wheat Pool, and on Friday evening the Weekly Newspaper Association banquet was held at which the newly-elected president presided. It was decided to hold the 1931 convention at Regina.

Expansion Of Dye Industry

Discovery Of Synthetic Dyes Has Been Wonderful Help

In the dyestuffs industry there was what may be called the Woad epoch of dyes which lasted until little more than half a century ago. The colors used in textiles and many other industries were natural products coming from plants or animals or minerals. It is an old story with a modern lesson that the scientific curiosity of Perkins, an Englishman, led to the building up from the waste products of the distillation of coal, of artificial dyes more brilliant than those and more lasting than woad and indigo, and without limit in their shades and tones. The discovery of pure research, led, although not in this country, to the founding of an industry invaluable to world not only for its primary output but also from the circumstances that it has required, created, and supported an army of research chemists. The labor of these men enabled Germany not only to secure almost a monopoly of the production of dyestuffs, but also to take the lead in the discovery and marketing of synthetic drugs, and, in the hour of her need, to thwart the endeavors of the Allies to deprive her of munitions of war.—The London Times.

Athletes recommend Minard's Liniment.

Perfect dyeing so easily done!

DIAMOND DYES contain the highest quality anilines money can buy! That's why they give such true, bright, new colors to dresses, drapes, lingerie.

The colors in Diamond Dyes make them so easy to use. No spotting or streaking. Just clear, even colors, that hold through wash and wear.

Diamond Dyes never give things that red-dy look. They are just like all at drug stores. When washing costs no more—is so easy—why experiment with make-shifts?

Diamond-Dyes Highest Quality for 50 Years

A Huge Undertaking

Building Of Sydney Bridge In Australia Requires Much Skill

The central arch of Sydney Bridge in Australia has been closed and it is expected that 18 months will elapse before the bridge is open for traffic. Construction by the British firm of Dorman, Long & Co., is the largest arch bridge in the world. The contract price was £4,217,271, and the total cost will probably exceed £6,000,000. There were provisions thrown in for the South Wales Government to extend the bridge to rise in wages, which have been largely met.

In planning the bridge it had to be considered that more than half the total traffic of Sydney, the chief port in Australasia, had to pass under it.

The bridge had to give headroom and clearance to big ocean liners.

The central arch is a single span of 1,650 feet, and there is a clear headroom for shipping of 170 feet at low water.

The top of the arch is 440 feet above the water, exactly the same height as the highest point on Hampstead Heath, and 75 feet higher than St. Paul's Cathedral. With its approach arches the bridge is 3,770 feet long. The width of the roadway on the bridge is 160 feet. It carries four lines of electric railway, in addition to a 57-foot roadway and two footways. There are 37,000 tons of steel in the arch construction and 13,000 tons in the approaches or a total of 50,000.

Persian Balm — the delight of dainty femininity. Imparts a fragrant charm to the complexion. Tones up skin and gives a velvety soft texture.

Cooling, refreshing, restorative.

Especially recommended in cases of roughness or chafing caused by weather conditions.

Catering To Visitors

Windermere, England, Bars Sunday Civic Sports To Boost Scenery

To boost its scenery and also give city employees a holiday, Windermere, England, has decided that all municipal tennis courts, putting greens and golf courses be closed on Sunday. Those in favor of sports on Sunday afterwards said that records showed that the clergymen and residents of Windermere used to watch football being played after church on Sunday, but the city council decided that visitors should go to Windermere for scenery and solitude.

Immigration Returns

During the first four months of the current fiscal year, 58,273 immigrants were admitted to Canada as compared with 94,214 for the similar period of 1929. Those from the British Isles numbered 19,317 and from the United States, 12,075, while 11,109 came from Northern Europe.

Minard's Liniment For Chest Congestion.

SUNDAY SCHOOL LESSON

OCTOBER 19

SIMEON AND ANNA — THE INSIGHT OF THE PURE IN HEART

Golden Text: "Blessed are the pure in heart; for they shall see God." —Matthew 5:8.

Lesson: Luke 2:25-39.

Devotional Reading: Psalm 84:1-7.

Explanation and Comments:

None Discusses: 2:25-32. — At the time of the birth of Jesus there was living in Jerusalem a righteous and devout (the Greek word means literally "God-fearing") man named Simeon, who was waiting for the coming of the consolation of Israel, "for the promised Messiah." It is interesting to observe how the description of Simeon's character agrees with the aim of the whole Old Testament revelation. All that was meant by the preceding long series of manifestations that had taken place was accomplished in the man. For hearken to what he is described—"just and devout," that is the perfection of moral character, stated in the text. "And he was an observer, waiting for the consolation of Israel," that is the ideal attitude which the whole of the graduate manifestation of God's presence through purpose-motivation through the ages was intended to make the attitude of every true Israelite—an expectant, eager, joyful attitude in the presence of the dispensation of all the gifts to God and man. "And the Holy Ghost was upon him." That, too, in a measure, was the ultimate result of the whole consolation of Israel. So this man stands as a bright, sunburst flower which had at last emerged from the root and had on his own person the fragrance of all the very results which God had patiently sought through millenniums of providential dealing and inspiration." —Archdeacon MacLean.

The Holy Spirit had revealed to Simeon that before he died he should see the Lord's Anointed. "Some interpreted this as meaning that he himself would be the Messiah, and he was told to be of God, sent him to the temple in the expectation that at last he was to see the Lord's Christ." When the parents of Jesus came in, old Simeon took the Babe in his arms and blessed God and spoke the beautiful words which have received the first two parts of the sentence in Latin in Simeon's Words To Mary, verses 33-35. "Simeon blessed Joseph and Mary (Joseph fulfilling her part of the prophecy, and Mary who stood there, marveling at his words, and to Mary he said, "Behold this Child is set for the fall and the rising of many in Israel, and upon you all will befall. Him shall 'fall,' while some will accept Him and 'rise' to a high spiritual life."

Good Recipes

Smoothness Of Texture In Recipes

That Call For Milk And Sugar

Do you ever have difficulty in getting a smoothness of texture in recipes that call for milk and sugar?

It is a wonderful flavor and consistency that is given by Eagle Brand Sweetened Condensed Milk. The milk and sugar are thoroughly combined (almost pre-cooked you might say) so that results are obtainable that could not be expected if you mixed the sugar and milk yourself. Having the milk and sugar already blended is a great advantage. Aside from saving sugar—and the trouble of mixing—there is the certainty of a finer flavor to the dish.

The condensed milk combines quickly and easily with all other ingredients—binds them closer together—and gives the recipe a smoother texture.

Another advantage of condensed milk is its convenience. One can keep several cans on hand as it keeps perfectly, so there is no such thing as running short, but rather a certainty of pure, fresh milk whenever it is required.

Athletes recommend Minard's Liniment.

Marvellous Yield Of Oats

Alert to the possibilities of "Marvellous" oats, William White, farmer of the Alert district, southeast of Biggar, Sask., has reaped a marvelous yield. From an experiment plot of four and a third acres, he threshed 121 bushels to the acre. The oats weighed 42 pounds to the bushel. The land was new breaking on an old pasture field. Neighbors threshed the grain, measured the plot and verified the yield.

Plenty Of Wheat

George Kabel, 67-year-old Illinois farmer, estimates that he has threshed enough wheat during the past 60 years to make 118,320 loaves of bread. His average has been 30,000 bushels a year.

STUDY QUESTIONS OF INTEREST TO THE DOMINIONS

London, England.—In a room of the House of Lords, the committee headed by Lord Sankey, the Lord Chancellor, opened consideration of two constitutional questions of wide significance to the dominions.

The first is the establishment of the Empire tribunal of appeal which was mentioned in last year's report of the committee on operating of Dominion laws. The second problem is that of the nationality of British subjects domiciled in the dominions. linked with the second is the further question of whether a married woman, upon her marriage to an alien, is to be enabled to retain her nationality.

Official communiques on the committee's progress only give the trend of the discussion in barest outline, although it is officially intimated that on neither point has anything approaching a definite decision yet been reached.

Hon. Maurice Dupre, Canadian solicitor-general, who represents Canada on the Sankey committee, took the view, it is understood, that the Empire tribunal should be constituted to include representatives of Britain, the Dominions, and India, as occasion arises, rather than having a permanent body. In the event of a dispute between two units of the British commonwealth, the court should be representative of each party to the dispute, with a neutral president, chosen either from Britain or from one of the other dominions in the opinion of Mr. Dupre.

In accordance with its unreserved acceptance of the optional clause of the court of international justice, the Irish Free State wishes to reserve the right to submit to the Hague tribunal, if Britain and the dominions, except the Irish Free State, signed the optional clause with the reservation that appeal to The Hague would not be made in case of disputes between members of the British commonwealth.

Discussions on the subject of nationality revealed a cleavage of opinion. The point at issue is one which received preliminary consideration by the heads of delegates at their meeting at Downing Street, namely, whether there shall be one common British nationality for the whole commonwealth or several nationalities within the United Kingdom, Canada, Australia, New Zealand, South Africa, the Irish Free State and India. South Africa and the Irish are pressing for a straight nomenclature. The British—and they are said to be receiving the whole-hearted support of New Zealand—are pressing for the recognition of one British nationality only for the whole commonwealth.

Hon. Maurice Dupre, it is understood, favors a compromise which would retain the wider British nationality while linking it with the nationality of a particular dominion. The Canadian travelling abroad it is felt would be better advised to speak of "advantage." He would not openly possess his Canadian citizenship but would retain the wider British nationality which would give him the protection of the British consular services. The greatest difficulty in this plan would lie, perhaps, in the choice of a convenient term. The title of "British-Canadian" has been suggested, but there has, as yet, been no formal proposal along this line. The present indications are that Australia is to support the Canadian position.

Favor Meat Inspection

Regina, Sask.—A vote in favor of the establishment of a system of meat inspection in the city was registered by members of the city council subcommittee on meat inspection, which met representatives of surrounding municipalities, the stock and butchers associations at a meeting in the city hall council chambers.

Assassins Sentenced

Calcutta, India.—Three of those accused of complicity in the assassination of the assistant superintendent of police in Lahore in 1928, were sentenced to death by a special tribunal. Seven others will be transported for life.

Work On Bay Line Satisfactory

No Foundation For Criticism Says Minister Of Railways

The Pas, Man.—Returning here from his first trip to Churchill, a journey made at this time partly because of charges that the seaport project was not proceeding as speedily as possible, Hon. E. G. Ross, Minister of Railways and Canals, declared that criticism is unfair and unfounded, and that the undertaking is going ahead in an extremely efficient manner.

The minister said that it is the government's intention to open the route in September, 1931, for tests in both export and import shipments. Unforeseen circumstances may change present plans, but it is hoped that, late in the year, a plan to open the route in a commercial way next autumn will be carried out.

He stated he was especially pleased with the excellent roadbed to the seaboard, and also paid tribute to George Kidd, superintendent at Churchill, and his staff for their efficient handling of the entire scheme. To his mind, an immense amount of work has been accomplished, reflecting great credit on both the department of the interior and the C.N.R.

Schooling Still Being Opposed By Doukhobors

Few Radicals Are Making Trouble In British Columbia

Victoria, B.C.—While internal disorders have been reported in interior Doukhobor communities, the problem of the Doukhobor school attendance has been virtually solved, except for a few radicals, according to Hon. Joshua Hinckscliffe, Minister of Education.

These reports show that the community Doukhobors have adopted Canadian methods of education since the opening of the fall term that their schools are full and in some cases must be enlarged.

About 40 children of radicals altogether are absent from their classes. This is a small proportion of the school population, but it is sufficient to create a problem.

It is understood the Department of Education plans action to force all of these children to be educated.

Aids To Beauty Costly

Stethettes Show \$250,000,000 Yearly Spent In United States

Washington, D.C.—Two thousand tons of rough, 4,000 tons of face powder, 6,000 tons of bath salts, 25,000 tons of vanishing, nourishing, and other facial creams, 9,000 tons of complexion soap, 26,000 tons of skin lotion and more than 50,000 tons of cold cream assist the people of the United States in annually maintaining that schoolgirl and schoolboy complexion. These aids of beauty cost \$250,000,000 a year. The "Beauty" business in the United States is worth \$1,000,000,000 annually and ranks among the first ten, according to C. C. Concanan, of the Department of Commerce.

Preference For Canadian Goods

Canadian Chambers Of Commerce Suggest That Farmers Diversify Operations

Toronto, Ont.—If the Canadian consumer will give preference to Canadian-produced commodities, and if the farmer will diversify his operations sufficiently to produce articles for which a good Canadian market is available, there will be a marked improvement in the return of the grower's return.

This is the conclusion reached by the agricultural committee of the Canadian Chamber of Commerce, and placed before the convention of that body here.

Returns From North

Winnipeg, Man.—R. G. O. Johnson, reputed to be Canada's farthest north drill operator, has reached Winnipeg from working on a claim 300 miles north of Churchill, Man., on Hudson Bay. He was a member of the party held up for two weeks by equinoctial gales while coming down by boat from the claims.

WILL VISIT CANADA

Dr. E. Leslie Burgin, M.P., one of Britain's outstanding authorities on international legal problems, who has been attending the international law conference in New York, and who is visiting Canada.

Lay Heavier Steel

One Hundred Men Put To Work On Line Between Melville and Watrous

Saskatoon, Sask.—One hundred men have started work on the Canadian National line between Melville and Watrous. A stretch of 28 miles, commencing five miles east of Melville, will be torn up and the 85-pound rails replaced by 100-pound rails. This work is part of the \$40-million program recently announced by the Canadian National Railways.

A. M. MacGillivray, district engineer, C.N.R., stated that the reason for the change was on account of heavy traffic over the line and the large type of engine now using. The heavy industry, using the new track will not interfere in any way with traffic, according to Mr. MacGillivray.

Air Minister Made Will Before Flight

Lord Thomson Requested Everything To His Brother

London, England.—On the eve of the departure of the R-101 on the dirigible's tragic voyage toward India, Lord Thomson, Minister of Air, prepared a will bequeathing all of his possessions to his brother, Col. Roger Gordon Thomson.

The document, witnessed by two officials of the air ministry, read:

"I am setting out on a flight for India and in case anything happens to me I leave all of my property and possessions to my brother, Col. Roger Gordon Thomson."

Lord Thomson ordered that the will be locked in a safe, and that it should be destroyed should he return.

Plans Canada's Finest Terminal

Sir Henry Thornton, Chairman and President of the Canadian National Railways, inspects the model of the \$50,000,000 terminal which his company has started to build at Montreal. The building to which the railway president is pointing is the proposed central passenger station and office building in the heart of the theatre and business district of Canada's metropolis. The plans provide for electrification of all passenger lines entering the terminal and make adequate provision for long distance and rapid transit traffic as well as for development of freight facilities which Montreal will need during the coming years.

Japan Seeks Increased Trade With Canada

Japanese Minister Makes Plan In Address At Toronto

Toronto, Ont.—A strong plea for increased trade between Japan and Canada was made by Hon. Eiichi Hayashi, Japanese Minister to Canada, in an address before the Canadian Chamber of Commerce here. The organization were guests of the Ontario Government at dinner.

The Japanese people realize that if Canada thinks her rising industries need protection, "it must and will be done," the minister said, after outlining the growth of trade between Canada and the Orient since 1913.

"They realize that every country has a right to regulate its own economic policy. They do not mind Canada having some protection, such as that of any foreign country. They merely desire to discover if there are any articles produced in Japan which have not come so far, but have the possibility of finding their way into Canada in future, or those which may possibly come to Canada in larger quantities than in the past."

Authorities Must Work Together

Co-Operation Is Only Way To Solve Transportation Problem

Kelowna, B.C.—S. L. Squires, of Toronto, chairman of the Canadian Good Roads Association, in addressing the annual convention of the Good Roads League of British Columbia, here, said that it was essential for federal, provincial and municipal authorities to work together to solve transportation problems. He outlined how good roads were changing the national and even political life of Canada.

"Good roads," he said, "are bringing about a better national understanding and are having a greater effect on the business life of Canada than any one realizes. Distance is now measured by time and not miles, and East and West are becoming better known to each other by means of fast and improved roads."

Mr. Squires strongly opposed use of commercializing roads in competition with railways, although he recognized that railways secured added business through improved highways.

Mapping the Moon

Mt. Wilson, Cal.—Mapping the moon by a new type of astronomical survey has been begun at Mt. Wilson Observatory. An adaptation of airplane map making photography gives views equivalent to swinging the astronomical camera a few thousand miles out into space to get more directly above side areas of the moon's face, something impossible from the earth.

MORE SUPPORT FOR AVIATION IN CANADA IS URGED

Toronto, Ont.—"Governments should refrain from carrying out aerial work which rightly belongs to commercial aviation—notably aerial survey," said Gen. J. J. MacBrien, president of the Aviation League of Canada, in speaking before the Canadian Chamber of Commerce here. "Experimental, development, exploration duties and advanced training provide plenty of work for the government machines," he said.

Among other suggestions made by General MacBrien for the advancement of commercial aviation were:

Progressive government policies. Dominion and provincial, needed so that commercial operators and manufacturers may plan accordingly.

Organized airways, which include up-to-date airports. The airways system of truck and branch lines should be energetically developed.

Substantial support should be given to Canadian aircraft manufacturers as it is most important the industry should be firmly established.

Small companies should be encouraged to amalgamate and branch roads should be entrusted to them. Commercial schools should be supported by an allowance for certificates issued.

Aeronautical education and research should be established. Any educational institution not providing facilities within its scope for its students to gain a knowledge of aviation will be considered behind the times and unprogressive.

General MacBrien outlined the present regular aeroplane routes in the Dominion, and predicted that within two years the present jump from Ottawa to Winnipeg would be bridged by air mail.

Favors Submarine Venture

Stefansson Thinks Wilkins Expedition Will Succeed

New York—Vilhjalmur Stefansson, Arctic explorer, arrived on the liner "Majestic" with the statement that the submarine is safer and more practical than the aeroplane as a means of reaching the North Pole.

Mr. Stefansson, who has been lecturing for three months at Cambridge University, expressed the belief that Sir George Hubert Wilkins, his right-hand man on the Arctic expedition of 1919-1920, will successfully conclude his under-water venture to the polar cap.

The explorer corrected a popular belief that the Arctic seas are filled with deep-reaching icebergs and said there were none within 400 miles of the pole.

"The human race has centred its activities on the northern part of the globe," he said, "and will continue its growth and population in that area. In this development there must be assurance of food and supplies, and if Wilkins demonstrates that a submarine can travel to the North Pole in safety, then frozen Canada, around Hudson Bay, Russia and Siberia, become new fields for man's exploitation."

Majority Of Women Voters

Women Voters Greatly Outnumber Men In England and Wales

London, England.—Women has indeed secured the last word. The registrar-general has announced there are now 362,000 more female voters than men in England and Wales.

The city of London proper is the only metropolitan district containing more men than women electors. In South Kensington the women outnumber the men by more than two to one.

Curiously enough, women voters are relatively fewest in the working class areas.

Welland Canal Damaged

St. Catharines, Ont.—Downbound traffic through the Welland Ship Canal had to be diverted to the old canal which was still being used for upbound traffic as the result of extensive damage to two valves at Lock 7 at Thorold. Excessive air pressure on the valves is blamed for the accident, which will cause considerable delay to traffic through the canal.

Bobbed Hair Is Healthful.

Women need fear no dire consequences from bobbing their hair. They now have the assurance from physicians of the American Medical Association that slashing their locks probably has no permanent effect, says Popular Science Monthly. It probably does not make the hair coarse, or make it grow less vigorously, either for a short time or permanently.

Stony Plain and District

A sitting of District Court will be held in Stony Plain on the afternoon of Wednesday next, Oct. 22, with Judge Crawford presiding.

Mr L Miller returned on Tuesday from a business trip to Stereo.

Mr F M Hawes, the young man who recently joined the staff at the local bank, has received notification of his transfer to the branch of the Canadian Bank of Commerce at Berwyn.

Tuesday's snow storm delayed construction work on the new local miniature golf course.

A All Nations Supper will be held in the United Church on Saturday next, from 5 to 30.

You are cordially invited to attend the annual bazaar and chicken supper at Moose Hall, Wed. next, Oct. 22, under the auspices of Stony Plain and Spruce Grove R. C. Parishes. A delicious supper awaits you.

Hallowe'en, Oct. 31, promises to be a big event this year, coming, as it does, on a Friday evening; consequently every dance hall will be in operation, including those at Bily, Heatherdown, Onoway, Muir Lake, and our own Moose Hall.

Don't forget the Hard Times dance given by Holborn Hall, W.A. on Friday, Oct. 24, at Holborn Hall. Good music. A good prize to the dancer wearing the best home-made hard times costume; and a luncheon at midnight.

Martin's Orchestra is playing again up at the Rexboro school, Wed. Oct. 22.

Church Services.

United Church services every Sunday Evg. at 7:30.

Harvest Festival services were held on Sunday last at the St Matthew church (Manitoba Synod) at Spruce Grove. Rev G Postle pastor. There was a good attendance.

Sleep on Right Side; Best for Your Heart.

If you toss in bed all night and can not sleep on the right side, try simple glycerin, salin, etc. (Adlerics). Just one dose relieves stomach gas pressing on heart so you sleep sound all night. Unlike other medicine, Adlerics acts on BOTH upper and lower bowel, removing poisons you never knew where there. Relieve constipation in 2 hours. Let Adlerics cleanse your stomach and bowels and see how good you feel. J. F. CLARKE, druggist.

In the afternoon the Rally Committee has the following speakers on the program—Ph Enders (Welcome Speech); Rev H J Boettner, Professor Baeppler, Miss H Rosman of Bruderheim.

Indoor baseball and various other outdoor and indoor games, lantern slide lecture, supper at the school, Wiener roast, etc., etc. are all planned for locals and visitors at this get-together.

Therefore, remember the date, Sunday Oct. 19. Every body welcome.

Golden Spike Drainage Case

Another stage has been reached in the long drawn-out case of Spruce Grove Municipal Council and the Provincial Drainage Council when the case reached the appellate division of Supreme Court of Alberta. The appeal was from a decision of Justice Ford.

The action had been one to recover the cost of a drainage survey of Golden Spike district made in 1922. A petition to become a drainage district had been presented in 1920 under the Drainage Act of 1916, but survey work was not commenced by the Government until 1922.

It was the contention of Spruce Grove Municipality that it was not liable for the cost of survey under the 1916 act, under which act its petition had been made.

Renezeky vs. Renezeky

Carvel's Civic Holiday was celebrated on Tuesday, when a big percentage of the population of that district migrated to Stony, to listen in on the case of Renezeky versus Renezeky.

This was over a charge of assault laid by Mrs Renezeky against her husband Mike. A lot of evidence of a conflicting nature was given. When all the evidence had been taken, Judge Ester Williams fined Mike \$1 and the costs. It would appear that Mike and Mrs Mike are not on the best of terms with each other, as they have been living separately for some time. Geo. J. Bryan for the defense.

Walther League News.

Arrangements are already complete for the Walther League Rally on Sunday next at St Matthew School No. 1.

Beginning with a special service in the morning, the day promises to be one worth while attending.

In the afternoon the Rally Committee has the following speakers on the program—Ph Enders (Welcome Speech); Rev H J Boettner, Professor Baeppler, Miss H Rosman of Bruderheim.

Indoor baseball and various other outdoor and indoor games, lantern slide lecture, supper at the school, Wiener roast, etc., etc. are all planned for locals and visitors at this get-together.

Therefore, remember the date, Sunday Oct. 19. Every body welcome.

Spruce Grove News

On Monday last most of the threshing outfits hereabouts resumed operations; at that time about 35 per cent of the threshing in this district had still to be done. Tuesday's storm put an end to all stock threshing.

Mr D Rivest started operations on Saturday last, and was fairly well patronised.

The Grove's dancers were well represented at the big affair in Stony on Friday evening.

The cold spell has put an end to the shipping of potatoes.

In an interview your correspondent had with Mr MacKean with regard to his proposed trip to Bonnie Scotland, he had "Nothing to say!"

The New Spud King.

Everybody knows now that there is a good crop of potatoes in this province and district this season; but not so many know that Mr Miller, the Grove's popular Boniface, has this season raised, on his plot on Municipal ave., a crop of super spuds, which have the size of the White Elephant, the beautiful contour of Wm. Magregor, and nutrition of Nettie Gem. Joe has been very generous with these to his friends; among others, The Editor receiving a full sack.

In a Parked Car on Baseline.

Sweet Little Thing—What time is it?

Boy Friend—Half past four. It won't be long till morning.

Sweet Little Thing—Goodness. Mother will be worried. I should have been in bed an hour ago.

Here and There

(619) Western Canadian cutts almost swept the boards in 16 classes at the Washington State Fair just concluded at Yakima, Wash., when the Western short horn cattle from the Canadian Pacific Railway Supply Farm at Strathmore, Alberta, won fourteen first prizes and nine seconds, also taking senior, junior and grand championships in both male and female classes.

A 354-lb. muskallonge, largest to be taken from the waters of the French River, this year, was caught a few days ago by F. R. Spotts, a visitor from Houston, Texas, and was entered in the annual competition at the French River's Willow Camp Trophy. The monster was landed after a thrilling fight that lasted forty minutes during which it struck water a number of times. When measured it was found to measure 49 1/2 inches in length and 25 inches in girth. A little later the same fisherman caught an 18-pounder musky.

Moderate developments in railroad traffic leading to heavier trains and increased speed is bringing about a saving in the weight of the cars and weights, according to Grant Hall, senior vice-president of the Canadian Pacific Railway. Interviewed on the subject, Mr. Hall said his company has used 100-lb. rails since 1921 and has more than 4,000 miles of this weight of steel, particularly in the heavy traffic districts between the larger cities and the Rockies. All the heavier trains made possible by greatly increased engine power have combined to bring up the weight of the 130-lb. rail which is now being studied on which a final decision will soon be reached.

The history of the folk song in Canada will be illustrated at the Quebec Festival of French-Canadian Folk-Song and Handicrafts which will be held October 16-18 next at the Chateau Frontenac. The Canadian rifle railway has again planned a comprehensive series of evening concerts of folk-songs, folk-music, dances, children's arrangements and dances.

All amateur talk of world overpopulation is what is wholly unwarranted, according to W. W. Swanson, head of the department of economics at the University of Saskatchewan. He interviewed on board the Empress of Australia on his way to the Imperial Economic Conference. He instanced, in support of his view, the fact that in the midst of the campaign to reduce world population, a recent study showed that a drought had occurred which had reduced the total yield of cereal crops by more than a wage wheat crop of the country.

For the second time in two years the Shaughnessy Shield, emblematic of the First Aid championship of polo in Western Canada, has come to rest in Vancouver. It was won by the Canadian Pacific Railway police team of that city, under the leadership of Constable W. M. Darknell.

Reports from Gloucester recently state that the schooner "Gertude L. L. Ladd" found her way remarkably fast under full sail. She is Gloucester's schooner of re-establishing the sailing supremacy of the North Atlantic and is scheduled to meet the "Duke of Lancaster" in a series of three races opening on Gloucester October 9, for a cup offered by Sir Thomas Lipton.

Immediate Relief for INDIGESTION

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude herbs. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume

in acid. The results are immediate with harmful after effects.

Once you learn this way you'll never deal in any other manner with the headaches, gas, bloating, nausea, dizziness, indigestion, biliousness, etc., due to an over-acid stomach and bowels.

Be sure to get genuine Phillips'. It's always a liquid; never made in tablet form. Look for the name Phillips' on the bottle. All drugstores—50c.

CHAPTER II.—Continued.

"Do you know," he broke in profusely on this sober reverie, "I'm almost famished. No" (as she turned a surprised face to him) "do you know it. I know it's not time to eat; and I don't care. Thunder! Gay, I've lived all my life by rules. I hate 'em. From now on, unless you make a nice tame house-cat of me, we'll eat when we're hungry; that is," he added, grinning, "if we can arrange to be hungry at the same time!"

"Otherwise," smiled Gay, her fears vanishing before his carefree grin, "I infer that well eat when you're hungry."

Nick laughed, but refused to answer this awkward question. Instead he said, stopping the car: "Here's a brook and a pine tree, so near that we can easily keep an eye upon the flies, though no 'self-respecting' tramp would consider stealing it. Say? You don't mind eating early, do you?"

The girl laughed at this tardy return to manners.

"What am I, to decree when I shall eat, if my lord and master . . ."

"Gosh!" Nick interrupted fervently. He raised awed eyes to heaven. "She calls me her lord and master! But" (with a sudden dropping to earth), "you can cut out that line of talk, Gay. It's medieval. Call me 'the boss' if you must; but not your lord and master. I'm at home in jumpers, but I'd look a fool with an ostrich feather in my cap."

"I'm not so sure of that," Gay contradicted, regarding his clear-cut profile critically. "One of those three-cornered hats, you know, with a plume resting on your shoulder . . ."

"Glory!" gasped Nick, staring at her. "Have you lost your mind, Gay? Come on; let's eat. It's lucky you brought along that lunch."

To her surprise Gay found that she was hungry. They devoured Miss Eddie Twitchell's chicken, with all the greed of childhood days. Indeed, after feeding on the dainties, Nick was obliged to wash in the convenient brook.

"Clean?" he questioned, turning a dripping countenance upon her; and Gay, laughing, dried his face on a paper napkin. But when he suggested

wading, and confessed a yearning to build a dam, she hesitated.

"The water's like ice, Nick; and besides . . ."

She was thinking that they were still some miles from the place where one procured a license and got married, "all in an hour"; but Nick signed resignedly, and for a moment his face clouded.

"When I planned this trip, Gay," he explained, "I vowed I'd do every darn thing that came into my head; yet I begin . . ."

"You begin," she interrupted, a little catch in her voice, "you begin by asking a girl to marry you. I suppose that just 'came into your head,' but it changed—everything. Oh, Nick, I don't want it to change things! I want all your dreams to come true. Build that dam if you want to terribly, and—well wade. I'll wade with you. I'd really like it, Nick. I—"

In her contrition she was pulling at his shoestrings, but he caught her hands, holding them with gentle firmness.

"Why, Gay!" His voice was tender. "I believe you're almost crying. What a dear goose you are! And why should it matter if things are a little different than I planned? Don't you know that I love having you along?"

"Really, truly, Nick?"

She lifted a sweet, flushed face, and he smiled into her eyes.

"Really, truly, Gay." He bent to her, then straightened up abruptly.

"And you were right to squelch my kid desire for wading. There's something better ahead of us today."

He gave her hands a reassuring squeeze, and lifting the empty basin he tilted it with careful aim into the car.

"Let's be off," he said, with all the enthusiasm she could desire. "I refuse to speed. I want to enjoy everything we see. By three o'clock we should reach State Line, and then . . ."

He gave her a comical glance; a curious blending of affection and amusement, as if he were not yet quite ready to be serious about the future.

This was Nick's great adventure, the girl's tenderly—his quest for the freedom he had never known. Not by word or look must she dim his happiness. She wondered, as male after male slipped by and he showed no sign of the nervousness she felt herself, if he realized the enormity of the step they were about to take. Only once did he mention it, and then to quote laughingly when a tire went flat: "Needles and pins, needles and pins, when a man marries . . . You know, Gay, that what I've brought me to but for you I'd be on my trusty feet." Yet he whistled cheerfully as he worked, and said: "We're a half hour late at the goal, my dear, but why worry, so long as we're together?"

But it was after four o'clock when they drew up before a shabby wooden building which flaunted a sign reading: "Josiah K. Miller, Justice of the Peace."

Nick stopped the car, but for a minute he did not stir. He sat there, arms folded, looking straight ahead, till Gay said gently: "Nick, it—it's

not too late now if you want to."

"Back out?" smiled Nick. He faced her; and something in his eyes made her heart race. "I don't desert my bride at the altar, Gay." He grimaced. "Doesn't look much like an altar, does it?"

His eyes were raised to the window below which hung the sign. Then, before she could speak, he was out of the car, giving a little brush to his clothes as if in a desire to appear well on this occasion.

"I'll just run up and see if this is right, though I believe the town clerk usually takes a Justice in these prairie Greens. I never got a marriage license before, Gay, and it may take time. If I'm longer than you expect, don't worry. I shan't go back on you! My dear girl, you look solemn as a funeral. Cheer up—the worst is yet to come!"

He turned away, then hesitating at the dingy doorway, came back to say: "Of course you know, Gay, that I was only trying to draw you up? There's going to be any 'worst' about it, either for you or me?"

He seemed to Gay, waiting nervously outside, that he was a long time gone; yet when she saw him coming, she felt, with weary weariness, a sense of peace. The town was a mixture of bustle and of passers-by, but he came near and spoke softly.

"I've got the license, and the Justice is waiting for us, I—"

"Nick," broke in the girl suddenly, "couldn't we go to a minister?"

"He laid a comforting hand on hers. "I'm afraid not, dear. There's been a lot of publicity lately about under-age couples getting married here. You look about fifteen, Gay, and I'm no Methuselah! The Parsons have been forced to shut down on these hasty weddings—that is, they won't do it without some sort of investigation. And we haven't time for that, though I hate like thunder to ask you to come up here!"

"Is—it is an awful place?"

"Nick," she hadn't met the town clerk offered to act as witness and take the Justice we were here. Come, dear. We mustn't keep him waiting."

Gay stepped onto the sidewalk, glancing down with apprehension at her dusty shoes.

"Do I look a sight?"

"You look all right to me, Gay, and that's all that matters." Then, with a sudden understanding of her mood, he added: "You look great! I bet that town clerk will expire of envy!"

It was with a laugh that they started up those dingy stairs that were to lead them "there" now, where? "The ec—," of that laughter was over, the door bearing the name of Josiah K. Miller, but it died at their first glimpse of the room beyond. It was, thought Gay, with a sense of suffocation so much worse than she'd expected! The dust of the stairs and hallway seemed to penetrate the very

It is natural for children to be happy, active and full of fun. When they are fretful, fussy and irritable, it is difficult to play with them or be sure something good is being done for them.

It is to meet the need for an absolutely safe corrective in childhood that Dr. G. E. Richards has gently restructured the stomach and bowels and drive out constipation and indigestion. See what Dr. Richards' patients say.

He has treated over 10,000 cases of children with Dr. G. E. Richards' Liver Pills. The results are remarkable. The children are healthy, happy and active.

It is the only safe medicine for children.

Hansen's Corners.

Threshing machines are now running night and day, in this district.

Hansen's Corners had another bumper crop this year. Mr. Gus Erickson, a local Scotsman, got 60 bu. Garnet wheat to the acre on summer fallow, and is negotiating for the sale of it as seed, to a firm on the Coast.

It is expected that Big Dan will soon be leaving for El Dorado, N.W.T., as agent for the Golt-Ziegel Co.

Mr Macleman will be sawing lumber and larches the coming winter, in Rocky Rapids district.

Mr H Summerfield killed a wild goose with a pitchfork while stacking grafts the other day.

It can now be stated for a certainty, beyond the peradventure of a doubt, and with out the fear of successful contradiction, that the station at Carvel will not be moved this year Anno Domini 1930, all others to the contrary notwithstanding!

Card of Thanks.

Mrs Truxa wishes to thank all friends for their kindness shown and expressions of sympathy, on the occasion of her recent sad bereavement.

Gay Colors for C.N.R. Cars.

Red and yellow are colors the human eye can detect at great distances. This explains the festive looking cars which are beginning to appear on the C.N.R. lines. They were not painted thus to put gaiety into railroading; the authorities say, but they were intended to relieve the minds of the men concerned in operating, who are continually exerting themselves to find new devices to make railway crossings proof against reckless motorists.

Railway Time Table

Going East—Every morning at 6:23. Every Monday, Wed. and Friday at 7:01.
Going West—Sun., Tues. and Friday at 13:28; every midnight at 2:13.

Open Seasons for Game

Following are open seasons for game—
Ducks and Geese—Sept 16 to Dec 14th.

Hungarian Partridge—Oct 1 to Nov. 14.

Prairie Chicken—Oct. 1-15.

Pheasant—No open season.

Deer—Nov 1 to Dec 14.

Outer, Nov. 1 to May 1.

Beaver, No Open Season.

Skunkrat—Between North Sask.

River and Tp. 91, March 15 to April 30.

Game Licenses can be had at Sun Office, where copies of the Game Act can be seen.

Death of James E. Reilly.

His many friends in town and district were grieved to hear of the death on Saturday last of Mr. James E. Reilly, in Edmonton. Deceased was a lifelong Liberal, and took an active part in the oldtime provincial and federal elections here. During the last two elections he had been in failing health, and was unable to participate.

"Jimmy," as he was familiarly called by his friends, was of a cheerful disposition, and possessed the happy faculty of making friends with everyone, no matter what their political denomination.

Deceased had been in the West some 35 years, and was a charter member of the Oldtimers' Association, and secretary to it for a short time.

Stony Plain was well represented at the funeral, which took place yesterday, in Edmonton.

Reckless Shooters

Some farmers in the district to the south are complaining of the tactics of the shooting parties who invade lands without permission, and in some cases come quite close to the house lot to do their shooting. These parties seem to come from Edmonton.

In one case last week a farmer noticed a party of shooters operating too close to his home for safety, while he was dining. He went out to protest, but the party seeing him coming, jumped in their car and beat it. The farmer, however, phoned his brother, down the road, who came out, intercepted the shooters, and found they were from the City.

This menace happens every shooting season, just when the farmers are too busy to attend to the marauders.

Stop at the "Stops."

Motorists visiting the City who had their troubles over a lengthy period determining what afternoons City stores kept open or closed; and, later, had some difficulty over the new parking regulations which allow a visitor just about time enough to walk around a block, now are having a new experience finding out when a "stop" sign means to stop, it being taken for granted that it isn't necessary to stop when intending turning to the right on coming to an intersection.

The City's Regulation reads:

Every person driving any vehicle shall, before entering upon, crossing or turning into any street, which has been set aside for a traffic court where visiting motorists are tried and fined for violations of traffic regulations which are charged so often as to puzzle a Philadelphia lawyer.

Edmonton now has a traffic court where visiting motorists are tried and fined for violations of traffic regulations which are charged so often as to puzzle a Philadelphia lawyer.

E. W. BEATTY

Canadian Pacific Contributes to Relief of Unemployment

E. W. Beatty, Back From Inspection Trip, Voices Confidence in Canadian West Despite Depression—Crop Outlook Good—Distinguished Party Makes Comprehensive Tour.

Confidence in the ability of the Canadian West to face and overcome its problems in a practical plan for saving in the relief of unemployment were outstanding features of the annual inspection trip through the West by E. W. Beatty, Chairman and President of the Canadian Pacific Railway Company, and a party of distinguished guests.

Following upon the trip, Mr. Beatty has announced the Company's contribution to the general plan for the relief of unemployment in Canada as follows:

"After conference with the Federal Government, an arrangement has been entered into whereby in consideration of the assumption of responsibility by the Government of the assumption of responsibility on the capital expenditure involved,

the company will immediately embark on certain works, which will be undertaken for the future but which in ordinary course would not have been approached until 1931 or 1932.

In framing the plan, particular attention has been given to the desirability of providing some relief to the agricultural workers by furnishing work for farmers and their work animals,

and by carrying transportation facilities to those districts where the length of the day makes it impossible to undue burden on the producer's time and resources.

Other works on the list are designed to absorb as much as possible of the surplus labour in the towns and cities.

The program follows: Track will be laid in the area between the grades from Crossfield to Westerly a distance of twenty-eight miles, and on the Lacombe and North Westerly lines, and on the line from the point of junction with the Calgary and Edmonton, 22 miles. Construction will proceed on the section of the Lacombe River line from the end of the present grading to Henrietta, a distance of approximately twenty miles, from Mediation to the Lacombe Lake line, a distance of thirty-five miles, from Cunnewick's Rosetown, a distance of twenty miles, and Dauphin, easterly for a distance of twenty miles, to the North Saskatchewan River, a line will be built connecting the trail at the North and the South end of Dog Lake. Do-

llasting will be taken in hand on an extensive scale on the Lacombe River line, the line from Crossfield to Lacombe, and on the Algomia district, all in Eastern Canada. Gravel roads will be laid in the New Brunswick district. One hundred and one miles of track in Ontario will be laid with a heavier rail section, and one hundred and fifty miles of track in the West will be laid with a lighter rail section.

Following upon the trip, Mr. Beatty has announced the Company's contribution to the general plan for the relief of unemployment in Canada as follows:

"After conference with the Federal Government, an arrangement has been entered into whereby in consideration of the assumption of responsibility by the Government of the assumption of responsibility on the capital expenditure involved,

Gravel roads will be laid in the New Brunswick district. One hundred and one miles of track in Ontario will be laid with a heavier rail section, and one hundred and fifty miles of track in the West will be laid with a lighter rail section.

Following upon the trip, Mr. Beatty has announced the Company's contribution to the general plan for the relief of unemployment in Canada as follows:

"After conference with the Federal Government, an arrangement has been entered into whereby in consideration of the assumption of responsibility by the Government of the assumption of responsibility on the capital expenditure involved,

the company will immediately embark on certain works, which will be undertaken for the future but which in ordinary course would not have been approached until 1931 or 1932.

In framing the plan, particular attention has been given to the desirability of providing some relief to the agricultural workers by furnishing work for farmers and their work animals,

and by carrying transportation facilities to those districts where the length of the day makes it impossible to undue burden on the producer's time and resources.

Other works on the list are designed to absorb as much as possible of the surplus labour in the towns and cities.

The program follows: Track will be laid in the area between the grades from Crossfield to Westerly a distance of twenty-eight miles, and on the Lacombe and North Westerly lines, and on the line from the point of junction with the Calgary and Edmonton, 22 miles. Construction will proceed on the section of the Lacombe River line from the end of the present grading to Henrietta, a distance of approximately twenty miles, from Mediation to the Lacombe Lake line, a distance of thirty-five miles, from Cunnewick's Rosetown, a distance of twenty miles, and Dauphin, easterly for a distance of twenty miles, to the North Saskatchewan River, a line will be built connecting the trail at the North and the South end of Dog Lake. Do-

llasting will be taken in hand on an extensive scale on the Lacombe River line, the line from Crossfield to Lacombe, and on the Algomia district, all in Eastern Canada. Gravel roads will be laid in the New Brunswick district. One hundred and one miles of track in Ontario will be laid with a heavier rail section, and one hundred and fifty miles of track in the West will be laid with a lighter rail section.
